*Let's sort it out*

## Community Feedback Wanted – Council Waste Services

The council is reviewing the current waste services system, so as a local Councillor I'm keen to hear from residents. I've put together an online survey and encourage as many residents as possible to complete it. The link for the survey is:

**[www.briffa.org](http://www.briffa.org)**

I would also appreciate if you can share this link with other residents in Hobsons Bay and encourage them to complete the survey too. The more feedback I get the better equipped I will be to both understand the needs and concerns of residents and advocate for real change.

Many residents have raised concerns with me about the current system and I am committed to seeing improvements made as soon as possible. I believe the council must provide a suitable minimum waste collection service for residents while also promoting the reduction of waste and increasing the uptake of recycling. I know there are people that are ok with a 120lt general waste bin being collected every fortnight, but I also know many families that are struggling and require a better system.

I look forward to your feedback!!

Cr. Tony Briffa JP  
Councillor & Former Mayor
